Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a process for the manufacture of a concentrated solution by distillation and evaporation of a dilute solution, classified in class 203, subclass 72.
- II. Claim 11, drawn to a concentrated aqueous hydrogen peroxide solution, classified in class 423, subclass 584.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown:

(1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)) In the instant case, the process as claimed can be used to make other and materially different products such as other industrial or commercial products e.g., concentrated sulfuric acid, concentrated nitric acid and etc. Likewise, the process as claimed can be made by another and materially different process such as the known processes described by applicants at the paragraph bridging pages 1 and 2 through page 2, lines 9-15 in the specification.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Virginia Manoharan whose telephone number is 703-308-3844. The examiner can normally be reached on Tuesday-Friday; 7:30AM-6:00PM.
